PROJECTS

- **Title: HealthCRAD (User Module)**
- **Skills:** React JS, JavaScript, HTML5, Tailwind CSS, Redux.
- **Description:** HealthCRAD is building a decentralized healthcare ecosystem for rural India, connecting local Ordinants with nearby Prime Medical Aid Cities. The initiative aims to provide accessible healthcare and emergency services in a streamlined manner. This network ensures ease and connectivity for the well-being of people in underserved regions.

- **Title: CatZapp**
- **Skills:** React JS, JavaScript, HTML5, Bootstrap, CSS.
- **Description:** It is a Blue-Collar Job Portal, a comprehensive web application designed to connect job seekers in the blue-collar sector with relevant job opportunities. Modeled after popular job platforms like naukri.com, this project utilizes the React framework for the frontend and Python for the backend to create a seamless and user-friendly experience for both job seekers and employers.

- **Title: MPS**
- **Skills:** Angular, TypeScript, JavaScript, HTML5,Bootstrap, CSS.
- **Description:** ManPower Solution is a cutting-edge app designed to streamline job applications specifically for individuals seeking opportunities in the construction sector. Tailored for laborers, technicians, and skilled workers, this platform simplifies the process of finding and applying for jobs based on qualifications, experience, and location preferences. With ManPower Solution, accessing employment opportunities in the construction industry has never been easier, empowering workers to secure fulfilling roles that match their expertise and aspirations
